SUMMARY

I possess more than one and a half years of extensive experience in field of frontend development. I am a seasoned Frontend Developer with a strong focus on React.js and Next.js, boasting an extensive and diverse background spanning over more than one and a half years in the field. My passion and expertise lie in crafting visually stunning and user-friendly web applications. I excel in designing elegant, reusable components that not only enhance the aesthetics of the user interface but also streamline development workflows.

KEY SKILLS

- ReactJs
- NextJS
- EcmaScript
- JavaScript
- HTML
- CSS
- Typescript
- NodeJS
- Git
- Tailwind
- AngularJS
- ExpressJS

WORK EXPERIENCE

Nov 2022 - March 2023

Frontend Developer - Trainee (NR Crew)

- As a Frontend Developer Trainee, I am actively learning and applying my skills in web development, focusing on building and enhancing user interfaces. My role involves collaborating with senior developers, designers, and other team members to create responsive, visually appealing, and user-friendly web applications. I work with modern technologies, including HTML, CSS, JavaScript, and popular frameworks like React.js, to bring designs to life.
- Coding & Development: Writing clean, maintainable, and efficient code to build web pages and components.
- Collaboration: Working closely with the development team to understand project requirements and deliver high-quality features.
- Bug Fixing: Assisting in identifying and resolving issues in existing codebases to improve performance and user experience.

Frontend Developer (NR Crew)

Apr 2023 - Present

- As a Frontend Developer, I am responsible for crafting seamless and engaging user experiences by developing high-quality, responsive, and interactive web applications. My role involves translating design mockups into fully functional user interfaces, optimizing performance, and ensuring cross-browser compatibility. I collaborate with designers, backend developers, and other stakeholders to deliver features that enhance the user experience and meet project goals.

PROJRCTS

PROJECT NAME: DRIP SHOP

- The platform empowers streamers to create their own communities and engage with viewers through captivating live streaming events.
- Users can actively participate in these live streams to directly purchase products, taking advantage of the interactive and dynamic nature of the platform.
- Dripshop.live offers a rich set of features designed to enhance the live shopping experience.
- It provides options for convenient home delivery or in-store pickup, ensuring flexibility and ease for customers.
- Technology Stack: React JS, Typescript, Tailwind CSS, Jotai, Context API, MUI.

PROJECT NAME: PAY3

- Pay3 seamlessly integrates with web3 tech, enabling users to buy/sell game tokens using crypto and fiat.
- It ensures top-notch security for gaming and NFT transactions, offering a secure signup method to protect your assets & data.
- The Decentralized Future: Be part of the future of gaming finance with Pay3, making transactions in the decentralized gaming ecosystem easy and secure.
- Technologies used: Next JS, TypeScript, CSS
